# *Note from the Team*

Hello!

Before you get started with Espresso, we wanted to share some notes on how to get the most out of your user experience.

The user guide that follows assumes that you will view the application on a computer screen, as a web application. We recommend using Google Chrome as a browser for the best compatibility with all of the features. Nonetheless, everything is mobile compatible with similar functionality.

For those using the system, we also request that you follow the use cases sequentially and in the order they have been laid out below. This system relies on both a customer and barista side that interact with each other. To best understand how Espresso works, please follow the guide as is.

Please enjoy!

Sincerely,  
*The Espresso Team*
